SUMMARY

Pre-final year Computer Science Engineering student with hands-on experience across full-stack web development, machine learning, and data analytics, backed by four end-to-end production-grade projects. Skilled at translating real-world problems into scalable, user-facing solutions, from data pipelines to polished interfaces. Seeking Software Development, Full-Stack Developer, or Data Analytics roles, with a strong interest in cloud-native, scalable system design and a fast-growing, adaptable skill set.

WORK EXPERIENCE

Data Analytics Intern | Zaalima Development Pvt. Ltd. *Aug 2026 – Nov 2026 (Remote)*

- Selected for a performance-based Data Analytics internship at Zaalima Development, working on live data-driven projects under flexible working hours.
- Evaluated periodically on work quality, deadline adherence, and teamwork, with responsibilities spanning data analysis and reporting.

Web Designer Intern | Diamond Mindglance Pvt. Ltd. *6 Weeks*

- Designed and developed fully responsive web pages following clean UI/UX principles, improving visual consistency and layout structure across the product.
- Applied modern front-end best practices to enhance usability, accessibility, and overall user experience in a professional team environment.

TECHNICAL SKILLS

Programming & Web: C++, Java, Python, JavaScript, TypeScript, React.js, Tailwind CSS
Machine Learning: Scikit-Learn (Random Forest, GBM, Decision Tree, Logistic Regression), Pandas, NumPy, Matplotlib
Data & Cloud Tools: AWS (Cloud Foundations, Microservices, CI/CD), Git, GitHub, Vercel, Postman
Database Management: SQL, Oracle, REST APIs, FastAPI (planned)

PROJECTS

DiabetesSense – ML-Powered Diabetes & CVD Comorbidity Risk Predictor

- Built an end-to-end ML system predicting concurrent Type-2 Diabetes & CVD risk using the CDC NHANES dataset with lifestyle and biochemical markers.
- Engineered feature extraction and preprocessing pipelines with Pandas & NumPy; trained classification models with scikit-learn achieving strong validation metrics.
- Developed an interactive React 18 + Vite frontend with Recharts visualisations and custom Glassmorphism UI; deployed on Vercel.

PhishGuard – ML Ensemble Phishing URL Detector with Real-Time Risk Scoring

- Engineered extraction of 40+ URL features powering a 4-model ML ensemble with high phishing detection accuracy, including HTTPS-aware logic.
- Designed a real-time risk gauge, threat indicator breakdown, and analytics dashboard with full scan history; deployed live with Tailwind CSS v4 and Framer Motion.

FeedaNeed – Full-Stack Food Donation Platform with Role-Based Auth

- Architected a donor-recipient-admin role-based platform with personalised dashboards, real-time analytics, and in-app notifications for tracking donation activity.
- Built with TypeScript for end-to-end type safety across a large component tree; fully responsive animated UI deployed on Vercel.

Hybrid Machine Learning-Based Automatic License Plate Recognition System — Research Paper *Apr 2026 – Jun 2026*

- Co-authored a published research paper on a multi-stage ALPR pipeline (HOG, LBP, OCR, SVM, Random Forest, CNN, K-Means).
- Designed the pipeline to improve recognition robustness under challenging real-world conditions, including varying lighting and motion blur.

CERTIFICATES

Honeywell Future Skills Edge Program – Artificial Intelligence (80 Hours) • AWS Academy Graduate – Microservices and CI/CD Pipeline Builder • AWS Academy Graduate – Cloud Foundations • Web3 Hackathon – Hands-on Blockchain & Web3 Development

EDUCATION

B.Tech in Computer Science Engineering | Deccan Education Society, Pune *Aug 2023 – Present*

Diploma in Computer Science Engineering | JSPM's RSCOE, Tathawade *Jul 2020 – May 2023*
